SPECIAL SERVICE IN EVERY CHURCH FOR EASTER DAY

Easter Day with its message of new life and the triumph over death was fittingly observed in Honolulu churches yesterday. The story of the risen Christ and how the salvation of the world depended upon His resurrection was voiced from every pulpit as a close to the services which began with Palm Sunday.

If Christ had not risen from the grave on Easter Sunday nearly 2000 years ago, said Dr. Lorenus Scudder in the Central Union church, "our Christian belief would be an empty dream with no hope for a life to come."

At St. Andrew's Bishop Restarick spoke of the world-wide rejoicing at Easter time even in war-ridden Europe where the guns of destruction are extinguishing the lives of thousands every day.

The Catholics of Honolulu held special services at the cathedral and in all the missions. Easter music was given and Easter sermons preached at the various places of worship around the city.

New members were received at Central Union and infants baptised into the church. After the regular service the Lord's Supper was observed as in all the churches. An Easter cantata "From Death to Life" was the feature of the evening service.

St. Andrew's Episcopal celebrated the day by six services, all of which were well attended. The Easter offering of \$1052.32 will be used for the organ fund.

The Christian church held its last Easter service in its temporary quarters, the old Y. M. C. A. building. It will soon move to its completed church in Makiki. Rev. Peters gave as his Easter sermon "What Really Has Christianity Brought to the World."

Easter at Schofield. Easter services were held in the post chapel, Schofield Barracks, yesterday at 10:45 a. m. Mrs. Aiken sang "I Know That My Redeemer Liveth" (Dudley Buck) and the children's choir, under the direction of Mrs. Aiken, led the singing of Easter hymns.

"Come ye faithful, raise the strain." "Christ the Lord is risen today."

"All hail the power of Jesus name." Good Friday service was held in the post chapel, Schofield Barracks, conducted by Chaplain Aiken, 1st Infantry. An overflowing congregation attended the service. The singing of Gounod's "There is a Green Hill Far Away" by Mrs. Aiken was an impressive part of the service.

SONG IS THE INDEX OF HEALTH.

The suffragettes are with us. Yet we must here acknowledge the fact that only male canaries sing. There are no Tetrastis among the birds; also, it is true that only domesticated male canaries sing.

When male canaries are given good tutelage, gentle care, and are kept in splendid health, they become mighty singers. Radiant health is just as needful for canaries, as it is for the members of the Metropolitan Opera Company.

Song is the index of health in birds as well as man. Plumage tells the same story. A bird in perfect physical condition and feather is the only kind we ought to have. The Philadelphia Bird Food Company are makers of a food that keeps birds healthy, happy and clever. Bird Manna is a food, a stimulant and a tonic. The famous canary breeders of the Saint Andreasberg, one of the Harz mountains in Germany, use and recommend this preparation. You can buy Bird Manna of your druggist or a package will be mailed to you for 15 cents in stamps.

Orange Color Food, produced by the Philadelphia Bird Food Company, is indicative to that beautiful deep yellow color—the glory of healthy canaries. This is a food—not a drug. It is used during the moulting season and while the feathers are growing on young birds. It is put up in half-pint bottles and sells at 25 cents.

Some valuable books are issued by this company, which ought to be in the possession of every bird-owner. "The Bird Fanciers' Handbook," a volume of 120 pages, well illustrated, will tell you all that is necessary for the care of your birds. This book will be mailed on receipt of 15 cents. The book and a package of Bird Manna will be mailed for 25 cents. Orange Color Food, Bird Manna, one 32-page and one 120-page bird book will all be mailed to you on receipt of 50 cents.

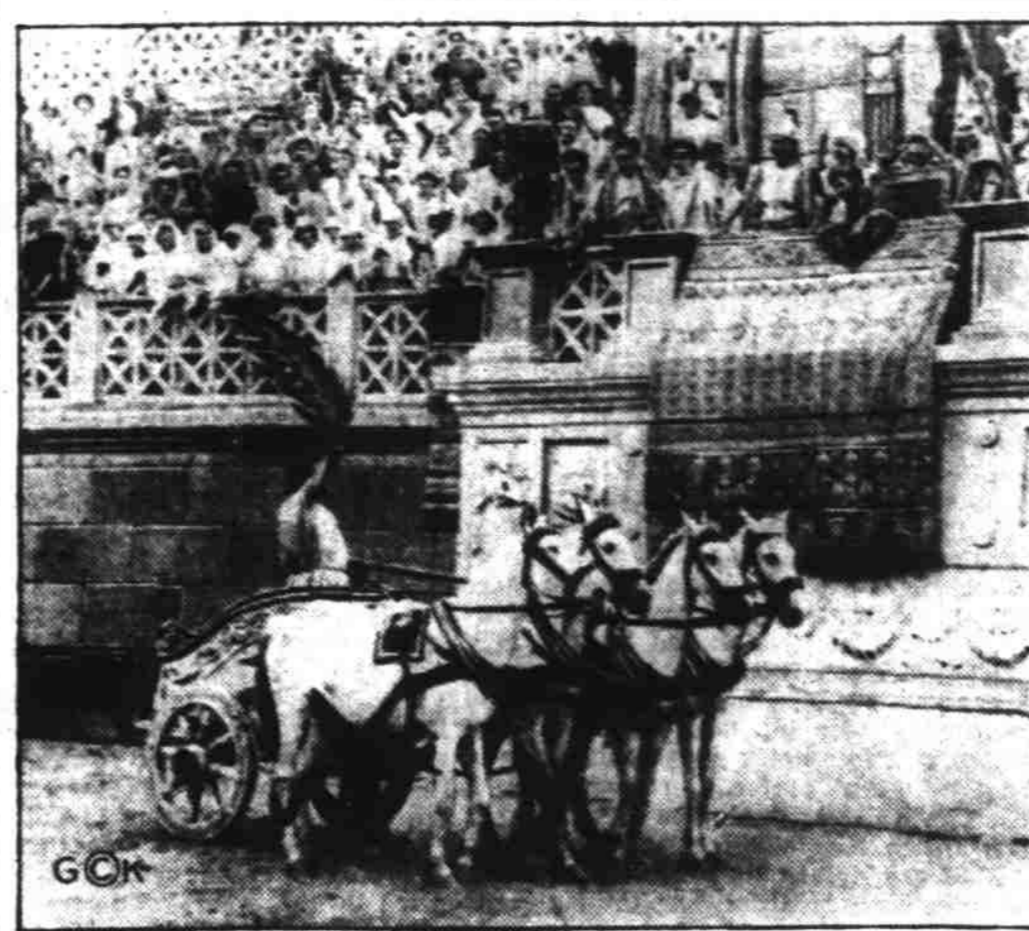

Note: Bird Manna is sold only in white metal caps, with the trade-mark, P. B. F. Co. in red. Take no chances with your bird's life by giving him dangerous imitations. The Philadelphia Bird Food Company, 400 North Third street, Philadelphia, Pa.—Adv.

MANY PRISONERS TAKEN IN MOUNTAIN FIGHTING.

Petrograd made official announcement today that in the battles of the Carpathians since January 21, the Russian troops have taken 250,000 prisoners. Two thousand prisoners and six machine guns were captured in the Carpathians last Friday.

RUSSIAN CAVALRY ROUTS GERMANS IN POLAND

In Russian Poland, where the fighting has become of less prominence since the situation in the Carpathians grew critical, Petrograd announces that a cavalry charge routed a German column marching along the road toward Kalwarya, north of Suwalki. The Germans made a desperate resistance, though taken by surprise, but were beaten down with the sabre.

HAWAIIAN MUSIC HUMMED BY ALL SAN FRANCISCO

(Continued from page one)

pointment doubtless is felt more deeply by the Hawaii kamaaina than by the mainland. The aquarium interests many. No doubt there are hundreds of persons who still believe that some of the fish are "hand-colored."

F. A. Potter, who is in charge of the fish exhibit, said that much trouble has been experienced in bringing the fish from Honolulu to San Francisco in first-class condition and that many of them had either died on the way or after they had been placed in the tanks. This probably accounts for the present smallness of the aquarium and the slender collection of fish. However, the aquarium is attracting hundreds daily.

New slides needed. A few up-to-date "slides" of native and street life in Honolulu, and some reels of motion pictures which are not quite as ancient as the ones now being shown, would greatly improve the lecture room.

The dioramas, one depicting Walkiki beach and the other the Pali, are hardly up to the standard. It is the opinion of many island residents that the interior of the building would be greatly improved by their removal. As it is now, the dioramas present a mass of stucco and color that convey little or no impression to the visitor.

The exterior of the Hawaii building doubtless will be very beautiful about June, or possibly earlier. The building itself is tiny alongside the massive structures such as the food products or California building. A board bearing the word "Hawaii" and stuck in the ground in front of the building is all that lets the visitor know where he is. The majority of the other buildings are suitably inscribed. It seems that the Hawaii building should rank with them in this respect.

A quaint, an aquarium and some motion picture and stereopticon views, then, compose about all that is of interest in the Hawaii building. Hawaii is fortunate in having her building located at the crossing of two of the main traffic arteries. Thousands of persons pass there daily and the attendance at the building is bound to increase as the months pass by.

Vice-President Marshall visited the building about two weeks ago on a tour of the exposition grounds. He was met by Resident Commissioner and Mrs. H. P. Wood, Commissioner and Mrs. Bertram G. Rivenburgh and J. Walter Doyle, publicity manager. In a few words to the hosts and hostesses the vice-president expressed an appreciation of what the territory has done toward helping make the exposition a success, concluding by saying that he intends to visit the islands in the near future.

Mrs. Wood Genial Hostess.

Mrs. H. P. Wood is proving a splendid hostess in the Hawaii building. She is there almost daily, greeting the visitors and explaining many little things of interest which otherwise would go unobserved. In one of the rooms Jonah Kumalee is doing a thriving business in ukuleles, Hawaiian music and curios. J. Walter Doyle, publicity manager, has gone to work and already has gotten things down to a good working basis.

If Doyle's present plans materialize, Hawaii Day, June 11, will be made a red letter occasion in the exposition's program of events. While his present plans are tentative, he believes they can be worked out to the satisfaction of both the exposition officials and the Hawaiian representatives.

"A greeting to Governor Pinkham by the old and new Hawaii," roughly sums up what Mr. Doyle has in mind for Hawaii Day. These ceremonies, or rather pageants, will take place at night and will form but a part of the regular Hawaii Day festivities. He plans to secure the use of the immense lagoon in the rear of the Hawaii building and have it illuminated by the aid of searchlights or other contrivances.

A dozen Hawaiian quintet clubs, seated in outrigger canoes in the lagoon, will furnish the music and at the same time represent the new Hawaii in one of its forms. A hula dance, a parade of Hawaiians in the costumes of a century ago, and pa-a riders would form other features of the spectacle. The evening would be brought to a close by the massed clubs singing "Aloha Oe." Altogether, the project seems a feasible one, and Mr. Doyle is confident that something on this order can be arranged.

Other arrangements for Hawaii Day

have not yet been completed. According to Mr. Wood the main event probably will be a reception in the Hawaiian building.

Hawaiian Exhibits All Over. Various Hawaiian attractions are scattered throughout the exposition. In one of the buildings there is an exhibit of pineapple. A quintet plays during the day and pineapple is served. Down in the "Zone" there is a so-called "Hawaiian Village," but there is still a doubt as to just how many of the "Hawaiians" have ever seen the islands.

In spite of the handicaps the Hawaiian building is well attended each day. The management is working smoothly from all appearances and the visitors are being taken care of with the spirit of hospitality for which the islands ever have been famous.

In company with Mr. Doyle, I had occasion to visit the press building, the pulse of the exposition. It is here that most of the news concerning the dilly happenings at the big fair is written and distributed not only to the San Francisco newspapers but to some 35,000 newspapers in all parts of the United States.

In the "city room" correspondents from the four corners of the globe gather. Each has his or her individual desk and typewriter and column after column of news is turned out hourly. Each San Francisco office has a branch office there. Mr. Doyle represents the Star Bulletin, the Advertiser and the Island papers. Every convenience and facility in the newspaper profession is furnished the correspondents and reporters. The entire building is a beehive of industry. While I was there a young woman from New York was preparing a story about the Hawaiian building which was to be syndicated among several thousand newspapers in the Middle West.

DIABETES

We announce this new FACT IN PHYSICS—influence the renal tract with an agent that opposes Renal and Hepatic degeneration and urinalysis will, in many cases, within twenty days begin to show diminishing sugar in Diabetes in people of 50 and over.

There having been no agent on prescription counters to reduce sugar in Diabetes (except opium which is not a specific—see Van Noorden on Diabetes) the importance of an anti-glycosuria is immediately manifest.

That sugar can be reduced and that many of those succumbing to Diabetes can have lives prolonged to other terminations has been established by urinalyses and confirmed by disappearing symptoms in many cases.

The presence of sugar being a PHYSICAL FACT, and its disappearance a FACT IN PHYSICS there is no uncertainty as to the results that have been obtained.

The agent to reduce sugar (Fulton's Diabetic Compound) can be had at Honolulu Drug Co. Ask for pamphlet. Current bulletin of recoveries and rationale mailed on application. John J. Fulton Co., San Francisco, Cal.—adv.

Abdul Hamid the second, the "Sick Man of Europe," escaped from prison where he was confined since 1909, according to a despatch from Bucharest.

The House of Silent Drama.
Evening (Two shows nightly), 6:45 and 8:30 o'clock.

OSTEOPATHY

From its name, it might be inferred that Osteopathy deals only with the adjustments of the bones. This idea is erroneous. Muscles, ligaments and various organs are dealt with in regard to position, relation and size. Osteopathy is not Massage, but a drugless method of removing the cause of the disease by careful readjustment, thereby establishing structural harmony.
